National Stock Exchange closed at the end of January, 1975.

SEE EXPLANATORY NOTES

## EXPLANATORY NOTES

### Market Value and Volume of Sales on Registered and Exempted Securities Exchanges

The data presented in this table are of two types depending upon the method of aggregation used by each exchange. Reports of those exchanges marked with an asterisk cover transactions cleared during the calendar month; clearances occur for the most part within five days of the execution of a trade. Reports for other exchanges cover transactions effected on trade dates falling within the report month. The variance introduced by these two different methods of aggregating the data is not considered to be significant and accordingly all registered exchanges are aggregated and reported in monthly summaries.

Stock data include voting trust certificates, certificates of deposit for stocks and American Depository Receipts for stocks.

Bond data have excluded transactions covering United States Government issues since March 1944.

Warrants data include trading in rights for all periods prior to January, 1972.

## EXPLANATORY NOTES FOR OFFERINGS TABLES

1971 TO PRESENT 1/

The data included in the Commission's statistical series on securities offerings are a sample of the universe of all securities offered in the United States. This sample includes all primary security issues registered with the Commission for immediate cash sale to the public pursuant to the requirements of the Securities Act of 1933 or Regulation A of that Act. The sample also includes information collected by the Commission on certain private placements as described below. Excluded from the offerings data are all offerings not greater than \$100,000; all debt securities with terms of less than one year; all secondary offerings; all non-cash offerings; issues withdrawn after effective registration; issues not defined as securities under Section 2(1) of the Securities Act of 1933; offerings--both public and private--by issuers whose securities are exempted under Sections 3(a)(2)-3(a)(6) and Section 3(a)(11) of the Securities Act of 1933 2/; all employee stock plans; investment company issues other than closed-end shares 3/; intracorporate securities transactions; and sales to foreign purchasers.

The source of data for registered offerings is the registration statement filed with the Commission by the issuer of the securities. (Registration data and offering data are not directly comparable because, beyond the exclusions noted above, the registration date and the offering date may fall in two different monthly or yearly periods.) Data on private placements are collected by a Commission survey of 39 life insurance companies on a monthly basis and 9 more on a quarterly or semi-annual basis, and by reports of private placements filed on the Commission's Form 8-K. Life insurance companies surveyed by the Commission had assets on December 31, 1972, of \$190,145 million, or 79% of all life insurance company assets. Only those private placement commitments which are actually executed are included in the statistics. No representation is made that the private placement activity of the life insurance companies surveyed approximates private placement activity as a whole in the United States.

The offerings tables make a distinction between Corporate Offerings and Foreign Government Offerings. It should be noted that Corporate Offerings include issues by non-corporate business enterprises such as limited partnerships, and that the Foreign Government classification includes foreign government issues of all levels, foreign government agencies, and foreign government-owned enterprises.

The industry classification used in the offerings tables should be self-explanatory for the most part. It should be emphasized that the Communication group includes telephone utilities. In the period 1971-73, 98% of the dollar value of the registered issues in this category was accounted for by telephone utilities. The Commercial and Other industry group is comprised of agriculture, construction, wholesale and retail trade, and all service activities other than financial services.

The security types used in the offerings tables are Bonds, Preferred Stock and Common Stock. The Bonds group includes convertible bonds, which are detailed on a special table. The Preferred Stock group includes convertible preferred stock; however, in the period 1971-73 registered convertible preferred stock accounted for less than 15% of the value of all registered preferred stock. The Common Stock category includes common shares issued by closed-end investment companies (preferred shares are included in Preferred Stock), as well as securities issued by non-corporate business such as certificates of participation and shares of beneficial interest, and other equity securities such as voting trust certificates and certificates of deposit. American Depository Receipts are not included in the offerings statistics.

All figures are subject to revisions as new information becomes available which requires either an addition to or a correction to data previously published. Revised figures will be indicated with an "R".

- 
- 1/ Explanatory notes applicable to the offerings data prior to 1971 may be found in Volume 33, pages 45 and 46, of the Statistical Bulletin. The major difference between the pre- and post-1971 data is that until 1971 the securities cited in footnote 2 were included in the offerings statistics.
- 2/ 3(a)(2) exempts domestic government issues and bank issues,  
 3(a)(3) exempts securities arising out of current transactions with a maturity not exceeding 9 months,  
 3(a)(4) exempts securities issued by non-profit and/or charitable groups,  
 3(a)(5) exempts issues by savings and loan associations,  
 3(a)(6) exempts issues by companies regulated by the ICC, and  
 3(a)(11) exempts intrastate offerings.
- 3/ No investment company shares are included for 1971 and 1972; closed-end investment company shares only are included for 1973. The Commission plans to revise the offerings data to include closed-end shares for the years 1971 and 1972, and when this project is completed, revised tables will be published in the Statistical Bulletin.

<sup>1/</sup> Closed-end investment companies were included in extended cash sale until December 1972.

Closed-end shares include preferred and common stock.

<sup>2/</sup> Includes mergers and consolidations subject to registration under 1933 Act, Rule 154, effective January 1973.

Note: See Explanatory Notes for Registrations

## EXPLANATORY NOTES

### Registrations

Data cover all registrations which became effective under the Securities Act of 1933 during the period covered. Issues are included as of the effective date, with the exception of those subject to post-effective amendment to report terms of offering. These are included as of the date of the post-effective amendment.

The classification primary corporate offerings refer to registered offerings for immediate cash sale where the proceeds of the offering are at the disposal of the issuing corporations. Secondary offerings are registrations of outstanding securities where the proceeds of the issue do not accrue to the issuing company. The dollar amount for both type offerings is based generally on the initial offering price. The classification unseasoned common stock includes initial offerings by companies registering common stock for the first time under the Securities Act of 1933, whereas seasoned common stock offerings are registrations by companies previously having securities registered under the 1933 Act. Other equity securities classification consists of offerings of certificates of participation or beneficial interests, warrants or options, voting trust certificates and other equity securities.

Issues to be offered for extended cash sale include investment company issues, and all offerings of employee savings and stock option plans. The classification foreign government is shown separately, whereas registrations by foreign corporations are included in with corporate offerings. Investment company securities include open-end, face-amount and unit trust offerings. Closed-end securities are included in primary corporate offerings.

Issues registered for other noncash purposes such as exchange transactions, securities given for property or services, or reserved for conversion are generally valued at the current market prices.

In order to eliminate double counting, the number of issues are shown for primary and secondary offerings only. However, effective registrations cover all cash offerings, noncash offerings, and offerings for extended cash sale.

Dollar amounts have been rounded and will not add to totals.

<sup>1/</sup> "New Corporate Securities Offered for Cash" series adjusted when necessary for delayed delivery schedules.<sup>2/</sup> Consists of sales by affiliated companies, private sales to foreigners, and sales to employees.<sup>3/</sup> Consists of foreign issues offered in the U.S., sales to other corporations, and an estimate of the amount of issues offered, but not sold.<sup>4/</sup> Consists of repurchases by public tender, open-market repurchases, and cash payments in connection with liquidations, reorganizations and mergers.<sup>5/</sup> Reflects only those exchange transactions that involve the issuance and retirement of different types of securities, e.g., debt issues for equity issues.<sup>6/</sup> Retirement of issues held by other corporations and in item 6.<sup>7/</sup> Consists of issues that were originally placed privately.

WORKING CAPITAL OF NONFINANCIAL U.S. CORPORATIONS  
December 31, 1974

The net working capital of nonfinancial U.S. corporations increased approximately \$20 billion in 1974; this compares with nearly \$21 billion in 1973 and \$19 billion in 1972. Net working capital, which represents corporate investment in current assets in excess of current liabilities, totaled \$266 billion at the close of 1974.

Annual Changes in Current Assets and Current Liabilities -- 1974

The approximately \$20 billion rise in net working capital for the entire year 1974 was the result of a larger increase in total current assets than in total current liabilities. Current assets increased nearly \$68 billion, while current liabilities rose approximately \$48 billion, with the increase in both measures only marginally larger than a year earlier.

Most of the increase in current assets was the result of a drastic surge in inventories approaching \$42 billion. Otherwise, other notes and accounts receivable increased almost \$23 billion compared with \$25 billion in the preceding year, while the cash and U.S. Government securities items each gained nearly \$1 billion; and "other current assets" rose slightly more than \$2 billion.

On the liabilities side, notes and accounts payable increased approximately \$25 billion in 1974 or one-sixth less than a year earlier. "Other current liabilities" rose nearly \$17 billion; Federal income tax liabilities gained approximately \$4 billion; and U.S. Government advances and prepayments increased nearly \$1 billion in 1974.

Fourth Quarter Changes in Current Assets and Current Liabilities

The gain in net working capital during the fourth quarter of last year was approximately \$2 billion compared with increases of nearly \$6 billion in the previous quarter and \$3 billion in the final quarter of 1973. Inventory investment approached \$6 billion, while trade notes and accounts receivable declined almost \$6 billion in the September-December period.

Traditional fourth quarter increases in holdings of cash and U.S. Government securities were again evidenced by approximate gains of \$2 billion and \$1 billion respectively. The ratio of these two items combined to total current liabilities--a frequently used measure of corporate liquidity--was .18 at the end of December 1974 as compared to .17 for the previous quarter and .20 a year earlier. Another measure of corporate liquidity, the current ratio (the ratio of total current assets to total current liabilities) was 1.61 at the close of the September-December period unchanged from the previous quarter and compared to 1.64 a year earlier.

## 1974 Investment and Sources of Financing

Besides the approximately \$20 billion added to corporate working capital during 1974, nonfinancial U.S. corporations invested about \$107 billion for additions to plant and equipment within the United States and nearly \$30 billion in other noncurrent assets including residential structures and fixed assets of foreign subsidiaries. To finance these long-term capital requirements, these corporations generated from internal sources nearly \$82 billion or approximately 51 percent of the required funds as compared with 61 percent a year earlier. These corporations raised \$24.9 billion through net new securities financing--sales minus retirements--of which \$4.1 billion were from net new stock issues and \$20.8 billion from net sales of debt securities. The balance of the financing, approximately \$50 billion, was provided by long-term bank and mortgage loans and other miscellaneous sources.

### Technical Notes

- 1) Year-end data for this series are based on Statistics of Income data through 1970, which cover virtually all corporations in the United States. Statistics of Income data may not be strictly compared from year to year because of changes in the tax laws, basis for filing returns, and processing the data for compilation purposes. All interim quarterly data and year-end estimates after 1970, are based on data compiled from many other sources, including data on corporations registered with this Commission.
- 2) The item, cash on hand and in banks, includes time certificates of deposit.
- 3) The item, U.S. Government securities, includes Federal agency issues.
- 4) Receivables from and payable to the U.S. Government do not include amounts offset against each other on corporations' books or amounts arising from subcontracting which are not directly due from or to the U.S. Government. Wherever possible, adjustments have been made to include U.S. Government advances offset against inventories on corporations' books.
- 5) The item, other current assets, includes marketable investments (other than Government securities and time certificates of deposit) as well as sundry current assets.
- 6) The current ratio is total current assets to total current liabilities.
- 7) The quick ratio is the summation of cash and U.S. Government securities of total current liabilities.
- 8) Figures are rounded and will not necessarily add to totals.

The accompanying table contains the aggregate estimates of current assets and current liabilities of nonfinancial U.S. corporations.

THE MARKET VALUE OF OUTSTANDING CORPORATE STOCK  
IN THE UNITED STATES

According to preliminary estimates, the market value of all outstanding corporate stock in the United States, including both common and preferred stock, was \$638.0 billion on December 31, 1974. <sup>1/</sup> A year earlier, the market value of total stock outstanding was \$904.4 billion.

At the end of 1974, the value of stocks listed on all exchanges was \$537.3 billion, as compared to \$763.9 billion in 1973. Listed stocks comprise about 84 percent of total stock outstanding and the value of NYSE listed stocks continues to account for more than 90 percent of total listed stocks. The value of stocks traded in the over-the-counter market was an estimated \$163.5 billion in 1974, down from the \$201.7 billion in 1973.

Total domestic stock, including intercorporate holdings, was \$704.4 billion in 1974 after deducting \$55.1 billion and \$62.6 billion respectively for investment companies and foreign companies. Total domestic stock was \$631.1 billion after subtracting intercorporate holdings of \$73.3 billion.

---

<sup>1/</sup> An article by Le Manh Tri in the September 1971 issue of the SEC Statistical Bulletin gives a detailed explanation of the procedures used in estimating the market value of total stock outstanding.

STOCKHOLDINGS OF INSTITUTIONAL INVESTORS  
AND OTHERS

According to preliminary estimates, eleven major institutional groups held \$247.9 billion or 38.9 percent of total stock outstanding at the end of 1974. 1/ A year earlier, their stockholdings were \$339.3 billion or 37.5 percent of total stock outstanding. The percentage of total stock outstanding held by other domestic investors slipped from 58.5 percent in 1973 to 57.0 percent in 1974. The percentage of total stock outstanding held by foreign investors was 4.1 percent at year-end 1974, only 0.1 percent higher than the year before.

The two institutional groups with the largest stockholdings are personal trust funds and private noninsured pension funds. Their combined holdings amounted to \$134.2 billion or 52.9 percent of the total for the eleven institutional groups as of December 31, 1974. 2/ Open-end investment companies, the third largest institutional group, held \$30.3 billion or 11.9 percent of institutional holdings.

---

1/ See page 436 of this Bulletin for the derivation of the figures on total stock outstanding.

2/ In comparisons between stockholdings of individual groups and the total for all groups combined, the subtotal (line 12) must be used because holdings of investment company shares by individual institutional groups are not available.

4/ Excludes holdings of insurance company stock.

5/ Book value.

## EXPLANATORY NOTES

Revenue, Expense and Balance Sheet of New York Stock Exchange  
Member Firms Doing a Public Business

The revenue, expense and balance sheet data are received from NYSE member firms pursuant to Rule 416(b)(1) of the New York Stock Exchange which became effective January 1, 1972.

Revenue and expenses are reported on an unconsolidated basis and without adjustments to investment accounts for respondents' equity in profit or share of loss of affiliates or subsidiaries.

Securities Commissions

Commissions earned on all agency equity and debt transactions including principal transactions and net commissions earned on introduced accounts carried by other brokers and on omnibus accounts carried for other brokers.

Realized and Unrealized Gain (Loss) in Trading and Investments

Realized and unrealized gain (loss) from market making activities in securities held for sale in the ordinary course of business and not identified as held for investment. Dividends and interest income on securities in trading accounts are treated as an adjustment to gain (loss) and are not reduced by any allocation of Federal income taxes.

Profit (Loss) from Underwriting and Selling Groups

Gross profit (loss) from management of or participation in underwriting syndicates and selling groups is determined as the difference between proceeds of securities sold and their purchase price and allowances received from or given to other brokers. Any unrealized loss on securities unsold at the time the underwriting account was closed is considered as a deduction from the proceeds of securities sold.

Investment Company Securities Commissions

Income derived from sale of investment company securities as a retailer and as an underwriter.

Margin Interest

Interest on customers' securities and commodities accounts for financing customer margin debits.

Other Revenue not Related To The Securities Business

Miscellaneous other non-securities agency transactions for: variable annuities, placement of savings and loan accounts, fractional interest in oil, gas or other mineral rights, participation in real estate syndications.

All Other Revenue

Revenue from sources related and unrelated to the securities business not included in items listed above.

Real Estate Investment Trusts: A Background Analysis  
and Recent Industry Developments 1961-1974

A study entitled "Real Estate Investment Trusts: A Background Analysis and Recent Industry Developments 1961-1974" is available through the U.S. Government Printing Office. The report contains an analysis of the REITs and discusses management organization, compensation plans and Securities Act registrations. The report was prepared in the Branch of Financial Reports, Office of Economic Research, as an Economic Staff Paper. Several of the principal findings of the study include:

1. The majority of REITs have a management structure found almost exclusively in the mutual fund industry--externalization of management. Externally-managed REITs have most of their managerial functions performed by a management company or financial institution; banks and mortgage companies account for well over one-half of REIT sponsorship. An incentive to set up an adviser is to earn the potential profit available from the fee charged for the advisory service. For many advisers, however, there is another highly motivating factor: the use of the trust as a possible means of extending the adviser's financing capabilities.
2. Since 1968, REITs have become a large source of construction loans. The most recent SEC statistics compiled indicate that REIT industry assets total about \$21.2 billion, with over 50 percent of the individual trusts having resources valued at \$50 million and over. In contrast, industry assets were just \$4.7 billion as recent as 1970. A large sample of trusts, however, shows a leveling off in asset increase; any increase in loanable funds in recent months primarily has come from short-term debt sources. During 1974, for example, REIT securities issues virtually came to a halt, with only an estimated \$350 million offered for cash sale. On the other hand, 19 REIT registrations valued at an estimated \$420 million have been withdrawn since September 1973.
3. A large number of the REITs have disclosed a number of short-term construction and development loans coming into default. An overall analysis of the industry shows that its problems chiefly are a consequence of lower earnings, non-earning assets, problem loans, high interest rates, and a great deal of difficulty in securing new cash particularly via the public offering of securities. Trust management has evidenced losses on "problem" loans in 1974 on a much higher scale than they realized in 1973.

4. Typically, there is a good deal of diversification and latitude in the way the individual trusts compensate their advisors. The actual market value of this service varies not only with the ability and expertise of the adviser, but also with the service performed and paid for by the adviser in generating and evaluating investment opportunities and in the allocation of other expenses. A number of REITs more recently have amended their respective advisory agreements to provide for fees based on net income rather than invested assets.

Orders for copies of the publication should not be placed with the Commission but instead must be placed with the Superintendent of Documents, U.S. Government Printing Office, Washington, D. C. 20402.

FORM 144 FILINGS FOR MONTH ENDING 04/30/75

THE FOLLOWING FORMS 144 WERE PROCESSED IN THE SECURITIES/EXCHANGE COMMISSION FOR THE MONTH INDICATED ABOVE. ACCEPTANCE OF FORM 144 DOES NOT CONSTITUTE ANY FINDING THAT IT HAS BEEN FILED AS REQUIRED OR THAT THE INFORMATION SUBMITTED IS TRUE, CURRENT OR COMPLETE.
